

FOR ROOFS

GRACE

WEATHER BARRIERS

Roof it right.®

High performance roofing underlayments help prevent leaks and call backs.

GRACE
Construction Products

Our unbeatable combination of contractor-friendly, high performance underlayments is putting smiles on the faces of roofers nationwide.

The three best ways in the business to keep the water out.

Our original, tried and true **Grace Ice & Water Shield®** is the name brand in self-adhered underlayments.

Our NEW high performance underlayment, **Grace Tri-Flex 30®** outperforms felt and is easier to install.

Grace Ultra provides superior performance at high temperatures, making it an excellent choice for any application requiring extreme heat resistance.

They protect a lot more than your roofing jobs. Recommending them can give you a real competitive edge every time you bid.

They tell potential customers that you know what works best. They're as good for your reputation as they are for your bottom line because they help eliminate call backs.

Grace Ice & Water Shield is the original fully-adhered membrane underlayment. The best roofers have confidence in its long, successful performance history.

Grace Tri-Flex 30 outperforms felt in every way. Like Grace Ice & Water Shield, it's engineered to be contractor-friendly and offers premium performance. It's tougher, lighter, more durable, and covers more area per roll than felt.

Grace Ultra is designed to protect sloped roofs from the effects of wind-driven rain and ice dams in applications where the membrane must withstand extreme in-service temperatures for extended periods of time.

GRACE

**WEATHER BARRIERS
FOR ROOFS**

**Ice, sleet, snow or
wind-driven rain –
the pros know to
insist on original
Grace Ice & Water Shield®.**

Grace Ice & Water Shield® The ultimate in leak prevention.

Nothing else seals
around fasteners like
Grace Ice & Water Shield.

It seals better around roof fasteners.

Our rubberized asphalt adhesive is formulated to grab fasteners as they are driven through the membrane forming a tight seal.

It sticks better to the roof deck.

Stays put in cold weather. Water can't travel to leak points.

It makes stronger watertight laps.

Unlike granular surfaced products, our smooth surface facilitates watertight overlaps.

It has better dimensional stability.

Lays flat and stays flat unlike other brands that wrinkle and prune, creating channels for water to travel under the membrane and into the house.

**Its patented
RIPCORD® Split Release
on Demand System
enables faster and
easier installations.**

GRACE

**WEATHER BARRIERS
FOR ROOFS**

Even the worst weather is no match for Grace Tri-Flex 30.

It can serve as a temporary water shedding roof covering for up to six months.

Grace Tri-Flex 30®. The smart alternative to felt.

Grace Tri-Flex 30 does everything you've always wished felt could do – and more. It's easier to install, outperforms felt. So you only have to do the job once. It's perfect under shingles, tiles, slate, metal or cedar shakes.

Felt tears.

Grace Tri-Flex 30 won't.

Grace Tri-Flex 30 is so different that you have to see it and feel it to believe it.

It's lighter & covers more area.

Fewer trips up the ladder. Covers five times the area. Each 10 square roll weighs only 30 lbs.

It's stronger.

Won't tear away from nails even in high winds.

It's more durable.

You can leave it exposed for up to six months. Great when you have to dry in the roof.

It's slip resistant.

It is formulated for skid resistance.

It lays flat and stays flat – every time.

Grace Tri-Flex 30 is pliable and easy to work with. It stays where you apply it.

It's **NEW** from Grace Construction Products.

**Weather protection
for the whole house.**
