

## GRACE ICE & WATER SHIELD®

“What makes it better?”

### Best Adhesion to the Roof Deck

The time-tested rubberized asphalt formulation in Grace Ice & Water Shield® provides superior initial and long-term adhesion without primer or nails. This strong bond helps insure the user of a watertight installation.

### Ripcord®—“Split Release on Demand”

This feature allows the splitting of the release paper from the membrane, making installations in detailed areas (chimneys, valleys) easy and rapid.

### Highest Quality Seal Around Roofing Fasteners

Grace Ice & Water Shield helps deliver premium roof leak protection via an aggressive rubberized asphalt formulation that seals around roof covering fasteners.

### Forms Superior Laps

Unlike many fully-adhered membrane underlayments, Grace Ice & Water Shield requires NO special treatment of the laps, making it easy to get a watertight seal.

# 12 Reasons Why Grace Ice & Water Shield® Is the Best Underlayment You Can Buy

## **Best Adhesion to the Roof Deck**

The time-tested, rubberized asphalt formulation in Grace Ice & Water Shield provides superior initial and long-term adhesion without primer or nails. This strong bond helps insure the user of a watertight installation.

## **Forms Superior Laps**

Unlike many fully-adhered membrane underlayments, Grace Ice & Water Shield requires NO special treatment of the laps, making it easy to get a watertight seal.

## **Highest Quality Seal Around Roofing Fasteners**

Grace Ice & Water Shield helps deliver premium roof leak protection via an aggressive rubberized asphalt formulation that seals around roof covering fasteners.

## **Re-roofable**

Unlike some granular surfaced membranes, Grace Ice & Water Shield will not adhere to the underside of the exposed roof covering. Grace Ice & Water Shield can be applied over the old Grace underlayment (except over Grace Basik®) in retrofit applications, making reroofing easier, less costly (since there is no need for removing the existing underlayment), more durable and environmentally friendly (as the structural deck remains intact avoiding the need to purchase additional wood decking).

## **Unique Non-Granular Slip Resistance**

Improved slip resistant surface offers superior foot traction without the granules or grit that inhibit watertight laps.

## **Lightweight**

Grace Ice & Water Shield is easy to handle. The product delivers premium performance with minimal additional weight.

## **Can Be Left Exposed Longer**

Grace Ice & Water Shield can be left exposed for up to a full 30 days and can even be used as a temporary roof if final roof coverings are delayed.

## **Won't Telegraph**

Unlike many thicker membrane underlayments with laps that are visible through roof coverings, Grace Ice & Water Shield remains invisible.

## **Superior Tear Resistance**

Grace Ice & Water Shield uses an extremely strong, cross-laminated, high-density polyethylene carrier sheet that will not tear under normal service conditions, but is easy to cut and detail.

## **Most Comprehensive UL Fire Classifications and Ratings**

Unlike most membrane underlayments, Grace Ice & Water Shield is UL classified under all classified shingles for use in detail areas or for full roof coverage. Grace Ice & Water Shield is the only membrane underlayment with a fire rating for internal fire resistance.

## **Longest Performance History**

Grace Ice & Water Shield is the original, fully-adhered membrane underlayment. This product offers the longest performance history and the highest confidence of performance for the life of the roof.

## **THE Name Brand In Underlayments**

Ice & Water Shield, a registered trademark of Grace Construction Products, is the name contractors trust to protect their roofing jobs and reputations for first class work. Don't be fooled. Ice & Water Shield is available only from Grace Construction Products.
