

Why do you need Grace Vycor Deck Protector?

Even with today's treated and high-tech decking products – which look great and last and last – preventing joist rot and decay, as a result of water accumulation under the decking boards, remains a major problem. According to recent statistics, one out of five decks being remodeled or replaced exhibits a failure of the supportive joists or stringers.

Grace Vycor Deck Protector is a unique solution. Covering the top of deck joists with Deck Protector creates an impervious barrier against water and moisture penetration in deck structures. It's a fast, effective, inexpensive way to significantly extend the useful life of decks.

GRACE
Construction Products

- **To prevent structural degradation of deck joists.** Flat decks allow water to accumulate on the surface of the joists. After a period of time, water damages the structural integrity of the joist.
- **To dramatically reduce costly deck repairs.** Rotted joists are difficult and costly to repair. Grace Vycor Deck Protector extends your deck's useful life for a fraction of the cost of repairs.
- **To protect the wooden joists.** Grace Vycor Deck Protector ensures that you will enjoy the full life of your decking.
- **Pressure-treated wood is prone to decay.** During pressure-treatment, preservatives do not always completely saturate the wood. Untreated parts (generally near the center of the wood or at the end cuts) can absorb water and let decay organisms inside the wood. Once decay organisms get past the chemical barrier, wood starts deteriorating from within.
- **To stop water infiltration at deck fasteners.** Fastener penetrations and wood surface cracks are common paths for water to get into untreated areas. Grace Vycor Deck Protector seals around nails and fasteners, closing off a key channel for water infiltration into deck joists.

is the first step to
rot prevention.**

4 inch width fits perfectly over joists and stringers where moisture is most likely to be a problem.

Make sure your deck lasts a lifetime.

Install Grace Vycor Deck Protector.

GRACE VYCOR[®] DECK PROTECTORTM

Self - Adhered Flashing

Why Grace Vycor Deck Protector is the unique solution to your most troublesome deck problems.

It prevents moisture and deck rot. Deck rot occurs as a result of moisture and water infiltration into your deck. If you control the moisture, you will control the rot. Grace Vycor Deck Protector ensures you'll enjoy the full life of the deck by controlling this unwanted moisture.

Grace Vycor Deck Protector is suitable for use on pressure-treated and non-treated lumber. It can also be used on the supportive structures of composite decks to make sure that the life of these structures lasts as long as the composite deck itself.

It dramatically reduces costly deck repairs. Grace Vycor Deck Protector adds less than fifty dollars to the cost of an average size deck (approximately 200sf). Joist rot and wood decay can result in the replacement of the entire deck. A small investment now can prevent costly repairs or replacement in years to come.

How many rolls do I need for my deck?

Deck Size (assumes joists are 16 in. on center)	Rolls Needed (approximate)
10 ft x 10 ft	1.5 rolls (4 in. x 75 ft)
12 ft x 12 ft	2 rolls (4 in. x 75 ft)
15 ft x 15 ft	3 rolls (4 in. x 75 ft)

Whether you're building a deck yourself or hiring a contractor, Grace Vycor Deck Protector is a unique addition that will

- **Extend** *the life of your deck*
- **Prevent** *costly deck repairs*
- **Insure** *your peace of mind for a small cost*
